

Blood For Life

Blood and Transplant

Blood for Life Foundation receives modern medical equipment for blood manufacturing and testing from NHSBT in the UK.

The equipment is shipped to developing nations to support transfusion services.

Blood for life foundation aims to provide its customers with solutions in donor recruitment and blood production.

We aim to work with Governments, Non-Profit and Non-Government Organizations to the extent necessary to accomplish our mission.

Blood for life foundation is a non government organisation established to

- raise awareness of the need for more African and Caribbean communities to become blood and organ donors

- Support blood transfusion in Africa and the Caribbean through donations and maintenance of medical equipment and training

Samantha Olasumbo Sadu MSc CSci FIBMS

A highly skilled and experienced professional in the field of Transfusion Medicine. She is currently employed by the National Blood Services UK as an Advance Scientist.
